# RUSSIAN ACADEMY OF SCIENCES. DOKLADY. MATHEMATICS

(Formerly Soviet Mathematics—Doklady)

Translation edited by Ben Silver with the assistance of Ralph Sizer

*A translation of*

РОССИЙСКАЯ АКАДЕМИЯ НАУК. ДОКЛАДЫ АКАДЕМИИ НАУК. МАТЕМАТИКА

Издательство "Наука", 1993 г.

Each issue corresponds to one volume of the Russian *Doklady*, which is issued three times a month, six issues constituting a volume.

**SUBSCRIPTION INFORMATION.** *Russian Academy of Sciences. Doklady. Mathematics* is published six times per year. Subscription prices for Volumes 48–49 (1994) are \$785 list, \$628 institutional member, \$471 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of \$10; subscribers in India must pay a postage surcharge of \$20. Expedited delivery to destinations in North America \$19; elsewhere \$46. Combination paper and microfiche subscription prices are \$1,044 list, \$835 institutional member. Microfiche of each issue will be mailed the fastest way possible before the issue is mailed by the printer. Microfilm subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106.

**BACK NUMBER INFORMATION.** For back issues see the *AMS Catalog of Publications*.

Orders for subscriptions and publications of the American Mathematical Society should be addressed to American Mathematical Society, P.O. Box 5904, Boston, MA 02206-5904. *All orders must be accompanied by payment.* Address changes and other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940-6248.

**COPYING AND REPRINTING.** Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. Requests can also be made by e-mail to [reprint-permission@math.ams.org](mailto:reprint-permission@math.ams.org).

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works or for resale.

*Russian Academy of Sciences. Doklady. Mathematics* is published six times per year by the American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213. Second class postage paid at Providence, Rhode Island. Postmaster: Send address changes to Russian Academy of Sciences. Doklady. Mathematics, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

Volume 48, Number 1

January 1994

## CONTENTS

G. I. Arkhipov and V. N. Chubarikov, <i>On the asymptotics of the number of terms in a multidimensional additive problem with prime numbers</i> .....	1
S. A. Vavilov, <i>On nontrivial solutions of certain classes of operator equations</i> ..	4
V. A. Gurvich, <i>Cyclic bilinear forms of enumerated graphs</i> .....	10
A. V. Kuz'minykh, <i>The inverse image of any nonextreme value of almost every continuous function has the power of the continuum</i> .....	14
A. A. Martynyuk, <i>On exponential stability with respect to some of the variables</i>	17
G. A. Mikhailov, <i>Monte Carlo methods for solving metaharmonic equations of the form <math>\Delta^{p+1}u + cu = (-1)^{p+1}g</math></i> .....	21
M. G. Yumagulov, <i>The method of functionalization of the parameter in iterative procedures for studying Hopf bifurcation for equations with aftereffect</i> ....	26
K. A. Abgaryan, <i>An asymptotic transformation of the equations of a time-dependent multichannel automatic control system</i> .....	32
L. A. Beklaryan, <i>The structure of the quotient group of a group of orientation-preserving homeomorphisms of <math>\mathbb{R}</math> modulo the subgroup generated by the union of stabilizers</i> .....	37
I. M. Gel'fand, M. I. Graev, and V. S. Retakh, <i>The <math>q</math>-hypergeometric equation of Gauss and a description of its series and integral solutions</i> .....	40
V. I. Prokhorenko, <i>On asymptotic and pseudoanalytic solutions of a parabolic problem with a multidimensional perturbation</i> .....	46
V. Ya. Yakubov, <i>Sharp estimates for normalized eigenfunctions of a Sturm-Liouville problem</i> .....	52
Akbar Kh. Begmatov, <i>On a class of problems of integral geometry in the plane</i>	56
R. R. Varshamov, <i>Some questions of projective arithmetic</i> .....	59
V. A. Verbitskii, <i>On multipliers of Fourier integrals with small interval of action</i>	67
I. A. Ikromov, <i>On an estimate of the Fourier transform of the indicator of non-convex sets</i> .....	71
F. Klark [F. H. Clarke] and Yu. S. Ledyayev, <i>New finite-increment formulas</i> ...	75
V. A. Kondrat'ev and S. D. Eidel'man, <i>On positive solutions of some quasilinear equations</i> .....	80
Z. Kh. Rakhmonov, <i>Mean values of the Chebyshev function</i> .....	85
V. I. Sedenko, <i>Classical solvability of an initial-boundary value problem in the theory of nonlinear vibrations of shallow shells</i> .....	88
V. Ya. Yakubov, <i>Sharp estimates for eigenfunctions, normalized in <math>L_2</math>, of an elliptic operator</i> .....	92
T. M. Abasov and A. M. Rubinov, <i>On the class of <math>\mathbb{H}</math>-convex functions</i> .....	95

A. A. Babaev and B. I. Musaev, <i>On solving a system of integro-functional equations of contact problems with nonlinear friction by Newton's method</i> ....	98
M. A. Krasnosel'skii, I. D. Maergoiz [Mayergoiz], A. V. Pokrovskii, and D. I. Rachinskii, <i>Differential equations with hysteresis nonlinearities of vector relay system type</i> .....	105
K. A. Rybnikov, Jr., <i>On the density of three-dimensional compacta</i> .....	110
Z. Yu. Fazullin, <i>Abstract formulas for higher-order regularized traces for discrete operators</i> .....	114
M. G. Yumagulov, <i>On an expansion of a periodic Green's function of equations with aftereffect in a series of exponential solutions</i> .....	117
A. E. Andreev, <i>Complexity and coding of Boolean functions</i> .....	122
N. S. Bakhvalov, A. V. Knyazev, and M. È. Èglit, <i>An inequality of Korn type and orthogonal decompositions in spaces of matrices</i> .....	127
O. V. Besov, <i>Imbeddings of Sobolev-Liouville spaces and Lizorkin-Triebel spaces on a domain</i> .....	130
V. A. Gurvich, <i>Biseparated graphs are perfect</i> .....	134
N. A. Zhura, <i>On the general solution of Leray-Douglis-Nirenberg systems with constant coefficients in the plane</i> .....	142
I. A. Ibragimov, V. Kherdle [W. Härdle], and A. B. Tsybakov, <i>On efficient estimation of an averaged derivative</i> .....	148
V. B. Larin, <i>Computation of the square root of a solution of the algebraic Riccati equation</i> .....	153
P. I. Lizorkin, <i>On approximation of functions on the sphere <math>\sigma</math>. On the spaces <math>B_{p,q}^\alpha(\sigma)</math></i> .....	156
S. I. Trifonov, <i>Analytic families of differential equations on two-dimensional varieties. Resolution of singularities, and singular perturbations</i> .....	162
R. A. Shafiev, <i>Regularization methods for the multi-stage optimization problem</i>	168
Sh. A. Alimov, <i>On spectral decompositions of distributions</i> .....	175
V. A. Andrunakievich and Yu. M. Ryabukhin, <i>Minimal right ideals of a ring relative to a fixed right ideal</i> .....	178
A. V. Bratishchev and L. I. Kalinichenko, <i>A description of the domain of convergence of a series of generalized exponentials</i> .....	183
N. A. Zhura, <i>The general boundary value problem for Douglis-Nirenberg elliptic systems of higher order with constant coefficients in the plane</i> .....	186
G. A. Kalyabin, <i>On two-sided estimates and exact values of certain capacities</i> ..	192
N. S. Kukushkin, <i>A new sufficient condition for the existence of equilibrium in the Cournot model</i> .....	195
B. V. Loginov, <i>On the determination of a bifurcation equation by its symmetry group</i> .....	200
G. A. Mikhailov, <i>Solutions of the equation <math>\Delta u + u^n = 0</math> by the Monte Carlo method</i> .....	206
K. V. Runovskii, <i>Direct and inverse theorems of approximation theory in the spaces <math>L_p</math> with <math>0 &lt; p &lt; 1</math></i> .....	210
R. S. Saks, <i>Generalized elliptic pseudodifferential operators on a closed manifold</i>	214

## CONTENTS

P. E. Grinvud [Greenwood] and I. A. Ibragimov, <i>On asymptotically efficient Bahadur estimation</i> .....	221
D. S. Kalyuzhnyi, <i>The <math>C^*</math>-algebra generated by two-sided convolution operators on the Heisenberg group</i> .....	225
V. N. Koshelev, <i>On the problem of divisibility of sources and spaces</i> .....	231
T. P. Lukashenko, <i>Wavelets on topological groups</i> .....	236
F. G. Maksudov and B. P. Allakhverdiev, <i>On extensions of symmetric Schrödinger operators with matrix potentials</i> .....	240
G. A. Mikhailov, <i>New Monte Carlo methods for computing critical values of parameters of the particle transport equation</i> .....	244
F. Kh. Mukminov, <i>On uniform stabilization of solutions of the exterior problem for the Navier-Stokes equations</i> .....	248
N. M. Nagornyi, <i>A constructive model of classical formal arithmetic</i> .....	251
È. S. Belinskii, <i>Strong summability of periodic functions and imbedding theorems</i> .....	255
F. A. Bogashov, <i>Representation of a biharmonic function in the complex space <math>C^2</math></i> .....	259
R. Gabasov, A. I. Kalinin, F. M. Kirillova, and G. N. Naumovich, <i>An asymptotically optimal regulator for a quasilinear system</i> .....	263
S. S. Goncharov, <i>Positive computable numberings</i> .....	268
V. A. Gurvich and M. A. Temkin, <i>The Berge conjecture is true for rotatable graphs</i> .....	271
Ya. Sh. Il'yasov, <i>Existence of periodic nonnegative solutions of the equations <math>-\Delta u = g(u)</math> in <math>\mathbb{R}^{N+1}</math></i> .....	278
A. B. Sekerin, <i>On the construction of entire and meromorphic functions of several variables having specified growth, and some applications</i> .....	282
M. A. Antonets, <i>Initial-boundary value problems for evolution equations with a transmission condition on an unbounded surface</i> .....	286
I. M. Gel'fand and M. I. Graev, <i>Singular representations of the group <math>SU(n, 1)</math> and projective unitary representations of the current group <math>SU(n, 1)^X</math></i> ....	291
A. K. Guts and N. L. Shalamova, <i>Affinely ordered Lie groups and axiomatization of pseudo-Euclidean geometry</i> .....	296
Yu. L. Ershov, <i>Relatively regularly closed fields</i> .....	300
A. S. Krivosheev, <i>Systems of convolution equations in convex domains in <math>C^n</math></i> ..	304
V. V. Ostapenko, <i>A method of recovering a divergence difference operator from its divergence differential-difference analogues</i> .....	308
N. Kh. Rozov and V. G. Sushko, <i>The method of barrier functions and asymptotic solutions of singularly perturbed boundary value problems</i> .....	314
R. Gabasov, F. M. Kirillova, and A. V. Pokataev, <i>Network models and methods of nonlinear programming</i> .....	319
I. I. Ezhov, <i>On the distribution of queue length in a classical <math>G G 1</math> system with discrete time</i> .....	324
V. I. Zubov, <i>Exponential asymptotic stability</i> .....	328
B. V. Kapitonov, <i>Simultaneous precise control of systems of linear elasticity</i> ...	332

È. G. Poznyak and A. G. Popov, <i>Lobachevsky geometry and the equations of mathematical physics</i> .....	338
M. A. Skopina, <i>Approximation of functions by quasipolynomials on convex sets</i> .....	343
G. I. Shishkin, <i>Difference approximation of the Dirichlet problem for a singularly perturbed quasilinear parabolic equation in the presence of a transition layer</i> .....	346
V. A. Shlyk, <i>Weighted capacities, moduli of condensers, and exceptional sets in the Fuglede sense</i> .....	353
S. K. Bloshanskaya and I. L. Bloshanskii, <i>Generalized and weak generalized localization for multiple Fourier-Walsh series of functions in <math>L_p</math>, <math>p \geq 1</math></i> .....	359
A. V. Bolsinov and A. T. Fomenko, <i>Orbital classification of simple integrable Hamiltonian systems on three-dimensional constant-energy surfaces</i> .....	365
Yu. A. Dubinskii, <i>On a nonlinear analytic problem</i> .....	370
V. I. Elkin, <i>Factorization and decomposition of affine control systems</i> .....	376
T. V. Savina, <i>On the law of reflection for higher-order elliptic equations</i> .....	380
V. M. Sidel'nikov, M. A. Cherepnev, and V. V. Yashchenko, <i>Systems of open distribution of keys on the basis of noncommutative semigroups</i> .....	384
L. A. Beklaryan, <i>Invariant and projectively invariant measures for groups of orientation-preserving homeomorphisms of <math>\mathbb{R}</math></i> .....	387
I. I. Golichev, <i>Some iterative methods for solving inverse problems</i> .....	391
E. P. Dolzhenko and E. A. Sevast'yanov, <i>Sign-sensitive approximations. The space of sign-sensitive weights. The rigidity and the freedom of a system</i> ..	397
S. I. Pokhozhaev, <i>On a mathematical model of electrolysis</i> .....	402
V. I. Ryazanov, <i>On quasiconformal mappings with locally summable deformation bound</i> .....	406
A. P. Soldatov, <i>Problems of Dirichlet type for the Lavrent'ev-Bitsadze equation. I: Uniqueness theorems</i> .....	410

Volume 48, Number 3

May 1994

## CONTENTS

E. P. Dolzhenko and E. A. Sevast'yanov, <i>Sign-sensitive approximations. Uniqueness and stability questions</i> .....	415
S. Kerov, <i>Plancherel growth of Young diagrams, and the asymptotics of alternating sequences</i> .....	420
A. S. Kleshchev, <i>On restrictions of irreducible modular representations of semi-simple algebraic groups and symmetric groups to certain natural subgroups</i> .....	425
T. A. Mel'nik and S. A. Nazarov, <i>The asymptotic structure of the spectrum in the problem of harmonic oscillations of a hub with heavy spokes</i> .....	428
A. P. Soldatov, <i>Problems of Dirichlet type for the Lavrent'ev-Bitsadze equation. II: Existence theorems</i> .....	433
M. B. Tabanov, <i>Billiard in an ellipse, geodesics on an ellipsoid, and new elliptic coordinates</i> .....	438

V. A. Il'in and E. I. Moiseev, <i>On some nonclassical features of a spectral problem for an elliptic operator with the condition that the oblique derivative be equal to zero</i> .....	445
N. K. Karapetyants and A. I. Ginzburg, <i>Fractional integrals in a limiting case</i> .....	449
A. A. Karatsuba, <i>The distribution of inverses in a residue ring modulo a given modulus</i> .....	452
K. A. Makarov, <i>Asymptotics of the Fourier transform of self-affine measures</i> ...	455
A. I. Pavlov, <i>On the number of equivalence classes of <math>(0, 1)</math>-matrices</i> .....	461
V. S. Rabinovich, <i>A criterion for local invertibility of Mellin pseudodifferential operators with operator symbols, and some of its applications</i> .....	465
M. S. Saburov, <i>On passage to the limit in singularly perturbed systems with variable small parameters</i> .....	470
V. P. Tanana, <i>On a condition for minimality of locally convex spaces in the solution of ill-posed problems</i> .....	475
P. L. Ul'yanov, <i>On transformations of Fourier-Haar coefficients</i> .....	478
A. Yu. Khrennikov, <i>Discrete <math>Q_p</math>-valued probabilities</i> .....	485
A. V. Arutyunov, <i>On degenerate quadratic forms in the calculus of variations</i> ..	491
A. G. Baskakov, <i>Some conditions for invertibility of linear differential and difference operators</i> .....	498
A. A. Vladimirov, M. A. Krasnosel'skii, and V. V. Chernorutskiĭ, <i>The Cauchy problem for systems with hysteresis</i> .....	502
V. D. Goppa, <i>The Frobenius-Young algebraic channel</i> .....	507
A. K. Gushchin and V. P. Mikhailov, <i>A condition that a class of nonlocal problems for a second-order elliptic equation be Fredholm</i> .....	510
A. N. Ermolov, <i>Revelation of preferences in a Bayesian game-theoretic model of social choice</i> .....	515
K. G. Malyutin, <i>Sets of regular growth in a half-plane. Applications to interpolation</i> .....	520
E. E. Tyrtshnikov, <i>New theorems on the distribution of eigenvalues and singular numbers of multilevel Toeplitz matrices</i> .....	524
M. V. Fokin, <i>The existence of a singular spectrum and the asymptotic behavior of solutions in a problem of S. L. Sobolev</i> .....	529
L. B. Shapiro, <i>On <math>\kappa</math>-metrizable compact Hausdorff spaces</i> .....	534
S. S. Artem'ev, <i>Mean-square stability of numerical methods for solving stochastic differential equations</i> .....	539
V. D. Goppa, <i>Bounds for codes</i> .....	543
V. Eger [W. Jäger], O. A. Oleinik, and A. S. Shamaev, <i>On a homogenization problem for the Laplace equation in a partially perforated domain</i> .....	545
V. E. Kapustyan, <i>Asymptotics of controls in optimal singularly perturbed parabolic problems. Global constraints on the control</i> .....	552
B. A. Kats, <i>On the Riemann boundary value problem on a fractal curve</i> .....	559
L. D. Kudryavtsev, <i>Generalized Steklov mean functions</i> .....	562
A. A. Mironov, <i>Generalized graphs with restrictions for the degrees of the vertices</i> .....	566
A. G. Popov, <i>Exact formulas for constructing solutions of the Liouville equation <math>\Delta_2 u = e^u</math> from solutions of the Laplace equation <math>\Delta_2 v = 0</math></i> .....	570
A. N. Starkov, <i>On multiple mixing of homogeneous flows</i> .....	573

B. Kh. Turmetov and S. R. Umarov, <i>On a boundary value problem for an equation with a fractional derivative</i> .....	579
V. A. Yurko, <i>An inverse problem for selfadjoint differential operators on the half-line</i> .....	583
M. D. Bronshtein, <i>On the Neumann problem for a semilinear elliptic equation with a control</i> .....	588
I. M. Gel'fand, M. I. Graev, and V. S. Retakh, <i>(R,S)-hypergeometric functions of one variable</i> .....	591
V. Yu. Dubinskaya, <i>An asymptotic expansion of the solution of a steady-state problem of heat conduction in a thin plate with two periods of non-homogeneities</i> .....	597
M. I. Imanaliev and P. S. Pankov, <i>The phenomenon of a receding boundary layer in the theory of singularly perturbed ordinary differential equations</i> .....	602
A. B. Kurzhanskii and O. I. Nikonov, <i>Evolution equations for pencils of trajectories of synthesized control systems</i> .....	606
Yu. È. Linke, <i>Sublinear operators and Banach spaces with the weak <math>\mathcal{A}</math>-analytic topology</i> .....	612
D. V. Sushko, <i>Convergence of a class of algorithms for the numerical solution of a convolution equation</i> .....	616
V. T. Filippov, <i>On a decomposition of the variety of alternative algebras</i> .....	622
A. A. Chikrii and P. V. Prokopovich, <i>The problem of evasion under interaction of groups of linear objects</i> .....	626
A. S. Antipin, <i>Controlled gradient saddle differential systems</i> .....	630
A. V. Bitsadze, <i>Two-dimensional analogues of the inversion formulas of Hardy and Hilbert</i> .....	635
N. G. Moiseev, <i>Partial factorization indices of a special class of matrix-valued functions</i> .....	640
L. V. Ovsyannikov, <i>On optimal systems of subalgebras</i> .....	645
A. I. Subbotin and N. N. Subbotina, <i>Piecewise smooth solutions of first-order partial differential equations</i> .....	650
S. R. Umarov, <i>On some boundary value problems for elliptic equations with a boundary operator of fractional order</i> .....	655
S.I. Fedorov, <i>On the solvability of boundary value problems for a model of bending of a homogeneous plate</i> .....	659
